B.Sc. in Computer Science. Self-motivated software developer. I am looking for Full Stack Developer position.

- ★ Highly knowledgeable in web development in both Frontend and Backend - mainly in React.js, Node.js, MongoDB.
- ★ Highly skilled in creating personal web development projects.
- ★ Knowledge in SQL programming and database planning.
- ★ Deep understanding in implementation of OOP / OOD principles.
- ★ Systematic vision and logical thinking, quick to master new technologies, great self-learner.
- ★ Ability to cope with complex technological challenges, Demonstrated work experience in the team and individually – in work and projects in various frameworks, and with great interpersonal skills.

WORK EXPERIENCE

November 2022 — August 2023 – Full stack developer in MetGo – internship position

- Creating Full stack projects to enhance JS and TS code skills (React.js, Node.js, MongoDB).
- Putting personal assignments to code reviews and learning to produce cleaner, more readable code.
- The internship introduced me to many new methodologies and widely-used libraries.
